## Boiler Water Test Kit

- Accurate dosage of corrosion and scale inhibitors.
- Drop tests for speed and simplicity.
- Kit 1 is ideal for daily checks on critical inhibitor levels.
- Kit 2 provides enhanced analysis for service engineers.

Measuring and monitoring treatment levels in boilers and associated conditioning plant is essential to maintaining output efficiency and longevity of plant. The WTS range of test equipment enables personnel to ensure treatments such as corrosion and scale inhibitors are correctly dosed.

WTS test kits contain all equipment and test reagents for every-day boiler water testing, optimising treatments and monitoring critical control parameters.

### WTS-K100346 Boiler Water Test Kit 1

Kit 1 is ideal for daily checks on critical inhibitor levels.

- 1 x P+OH Alkalinity Drop Test 0-2400 mg/l
- 1 x Chloride Drop Test 20-12000 mg/l
- 1 x Hardness (Total) Drop Test 5-60 mg/l
- 1 x Sulphite Drop Test 25-150 mg/l
- 1 x pH Test Strips pH 7.0-14.0

### WTS-K102082 Boiler Water Test Kit 2

Kit 2 provides enhanced analysis for service engineers.

- 1 x P+OH Alkalinity Drop Test 0-2400 mg/l
- 1 x Chloride Drop Test 20-12000 mg/l
- 1 x Hardness (Total) Drop Test 5-60 mg/l
- 1 x Phosphate HR Comparator Disc 0-100 mg/l
- 1 x Phosphate Reagent Pack 0-100 mg/l
- 1 x Sulphite Drop Test 25-150 mg/l
- 1 x Eutech Expert pH Meter pH 0-14
- 1 x Eutech CON/TDS Meter 0-20000uS, 0-100°C
