WTS Test Strips

Test Strips

- Reagent free
- Hazard free
- Rapid
- Always to hand
- Semi quantitative results

Test strips offer quick, clean results without the fuss of reagents or tablets. Their dip and compare method makes them a popular choice for many applications where speed and simplicity are most important.

Q - Qualitative Papers

Indicator paper supplied in strips. Dipping the strip into a sample will induce a colour change in the paper if the compound of interest is present.

SQ - Semi Quantitative Papers

Supplied in packs of 25, 50 or 100 strips, the pad or set of pads will change colour when dipped into a sample if the compound of interest is present. The intensity of the colour produced is compared to a standard colour scale to determine the approximate concentration of the compound.
