Non-Oxidising Biocide Test Kits

- Control microbiological activity.
- Measure biocide levels in minutes.
- Designed for use by non-technical personnel.
- Ensure environmental bleed concentrations are met.

The WTS non-oxidising biocide test kits are based on novel colorimetric or titrimetric procedures and are designed for use by nontechnical persons as a site-based aid. Accurate biocide levels can be measured in minutes to ensure continued system control.

Non-oxidising biocides are used across industries to control microbiological activity in a wide range of water systems, often in rotation with oxidising biocides. Biocidal performance is concentration dependant, so it is essential to monitor the activity levels closely in any system to ensure microbiological control.

There is also a developing sensitivity to non-oxidising biocide pollution of waterways from industrial waste, particularly from cooling tower bleed. The WTS non-oxidising biocide test kits provide a simple solution to ensure bleed concentrations are in line with environmental consents.

Product	Range	Tests/Pack
Bardac 22 Test Kit (Lonza Biocides) (Disposable single use kit)	0 to 15 mg/l	50
Bronopol Kit (2-bromo-2-nitropropane-1,3-diol)	0 to 50 mg/l	50
DBNPA Kit (2,2-dibromo-3-nitrilopropionamide)	0 to 6.8 mg/l	50
Glutaraldehyde Kit	12.5 to 1600 mg/l	50 +
Isothiazolinone Kit	0 to 7.5 mg/l	50
MBTC Kit (methylene bis (thiocynate))	0 to 5 mg/l	50
THPS Kit (tetrakis(hydroxymethyl) phosphonium sulphate)	0 to 20 mg/l	50
QAC (Cationics) kit	0 to 1000 mg/l	100 +
